

Over 30 Years Of Space Flights Innovations

30 years in space flight experience brings the finest design, build and development of next generation EGSEs, HILs, FPGAs and Flight Software solutions into the market.

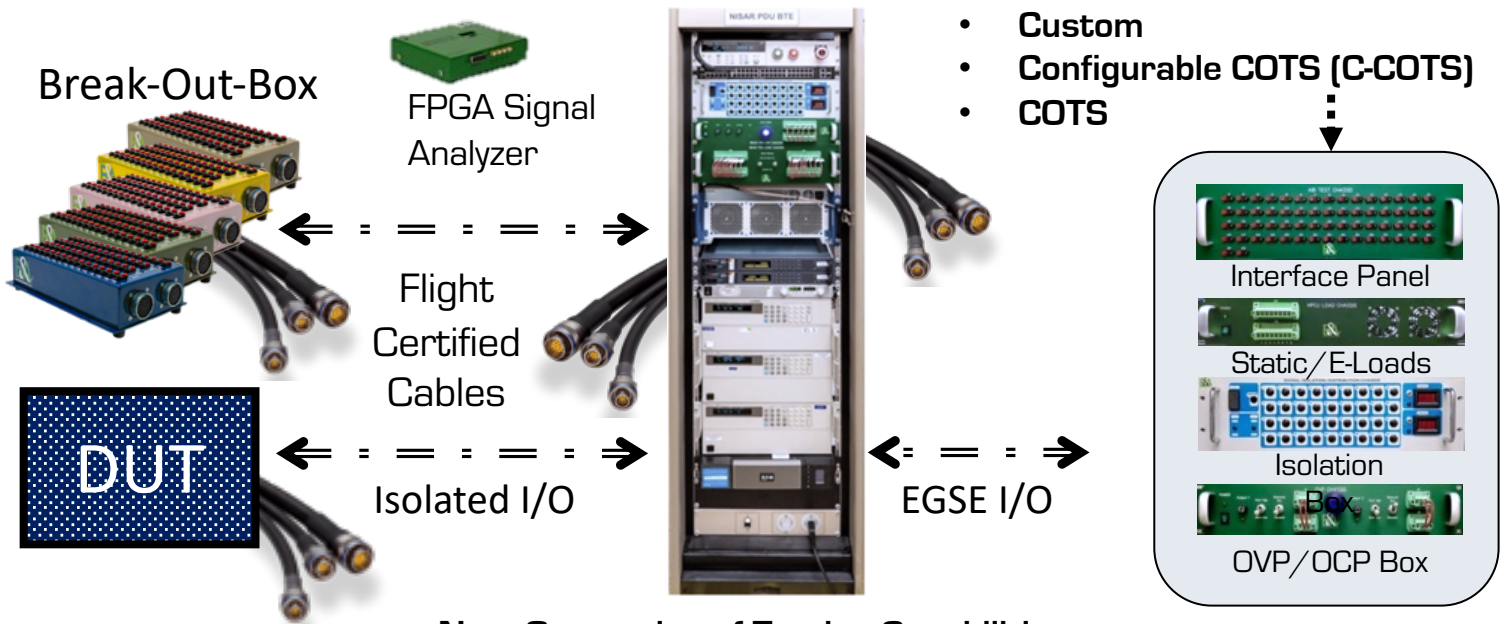

Flight Hardware & Software Design

System Integration & Test

EGSE & ATE Design & Build

Worst Case Analysis & FMEA

Space Flight Test Solutions

Next Generation of Testing Capabilities

B&A has transformed legacy EGSEs into Configurable Commercial Off-The-Shelf (C-COTS) systems.

Designed for rapid adaptability
Delivered pre-certified FMEA solutions
Mitigated sustainment risk

Improved modularity
Reduced time to delivery
Substantially reduced the footprint

Flight and Ground Projects
